

The Building Clouds Advantage

Virtual Facilities Engineer | Affordable Staffing

Live, Experienced, Helpdesk Engineers to Support and Supplement Your Team

Do More With Less ... Expense

Today's Building Engineers are being asked to **do more with less**. With rapid **advancements in technology** does your team have what it takes to ensure your facility is **both efficient and comfortable**?

We Handle the Details, You Focus on What's Important

Let our Virtual Facilities Engineers guide you through the **complex world of HVAC and lighting**. From **heating and cooling adjustments**, through **project management** of equipment repairs and maintenance, **we free up your time**.

Easy to implement, easy to connect, big savings, most systems can be connected in **less than a day**. Your Virtual Engineer will begin monitoring your systems, and ensuring your **tenants are comfortable**.

Our Virtual Engineer service assures that your **facilities are operating properly**. We work with your team (even if it is only you) to **correct system problems** before they become an emergency.

You'll have an **experienced Facilities Engineer** at your disposal, **without the expense** of hiring, training, sicktime, or HR headaches.

Automated Intelligence, Coupled with Facilities Professionals

How it Works

Choose Your Level of Support **We Connect to Your Building** **You Get More Done Each Day**
